Allowable Subject Matter

1. Claims 1-46 are allowed.

Independent claims 1 and 24 recite "... determine a direction of an edge that includes the original pixel of the original first video image, generate an initial first pixel-value component from the value of the original pixel of the original first video image by executing an algorithm that corresponds to the direction of the edge..." which is a feature that is not anticipated nor obvious over the art of record. Independent claims 8 and 31 "...generate a first motion value for a first filler video image from the values of the original pixels of the first and second original video images, and cause the first motion value to indicate motion for a first predetermined number of filler video images following the first filler video image if the first motion value indicates motion with respect to the first filler video image..." which is a feature that is not anticipated nor obvious over the art of record. Independent claims 16 and 37 "...generate an initial value for the filler pixel based on the direction values; and combine the original and filler video images into a resulting video image in which t-he filler pixel is disposed between the first and second groups of pixels..." which is a feature that is not anticipated nor obvious over the art of record. Independent claim 45 recites "... filtering the raw motion value to generate the motion value equal to zero if the raw motion value is less than or equal to eight, equal to half the raw motion value minus four if the raw motion value is greater than eight and less than thirty eight, and equal to fifteen if the raw motion value is greater than or equal to thirty eight..." which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 2-7, 25-30, 32-36, 38-44 and 46 are allowed for the reasons concerning the independent claims.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Andy S. Rao whose telephone number is (703)-305-4813. The

examiner can normally be reached on Monday-Friday 8 hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Chris S. Kelley can be reached on (703)-305-4856. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
